

We are System Integration

About us

Skills for Security Systems is a Limited Liability Company (LLC) operating under the provisions of Law No. 72 of 2017 concerning investment guarantees and incentives, affiliated with the General Authority for Investment and Free Zones.

Our company specializes in security systems, providing protection and security for private and public establishments, in addition to general contracting and supplies, by offering the best security solutions.

Our Vision

Skills aims to be a leader in innovative and effective security solutions. We aspire to create a safe environment for our clients and communities.

We strive to provide modern technology and customized solutions that effectively meet the needs of our customers, with a focus on excellence in service and innovation.

We are also committed to building lasting relationships with our clients and business partners, enhancing security and comfort in the lives of individuals and organizations.

After-Sales Service

Regular Inspection

Includes conducting periodic inspections of all security systems to ensure their safety and proper functioning.

Device Maintenance

Involves replacing or repairing any damaged or outdated parts in the security equipment.

Software Updates

Regular software updates are performed to ensure the system benefits from the latest technologies and fixes any security vulnerabilities.

After-Sales Service

Performance Evaluation

Regular performance assessment is conducted to ensure the system meets client requirements and to enhance its performance as needed.

User Training

Regular training courses are provided to system users to ensure they use the security systems effectively and correctly.

Technical Support

Ongoing technical support is available for customers to answer their inquiries and resolve their issues as quickly as possible.

Comprehensive CCTV Solutions with IP and HD Systems

At **Skills**, we offer state-of-the-art **CCTV systems** in both **IP** and **HD** formats, providing comprehensive security and surveillance solutions. Our **IP CCTV systems** deliver high-definition video with advanced features like remote monitoring, smart analytics, and easy integration with other security components, making them ideal for larger, more complex sites. On the other hand, our **HD CCTV systems** offer reliable, crystal-clear video at a more affordable cost, perfect for smaller setups that still require excellent surveillance quality. With both options, **Skills** ensures a tailored solution to meet your specific security needs, from installation to ongoing support.

Streamlined Communication with Secure Intercom Systems

At **Skills**, we install **intercom systems** that make communication within a building simple and secure. An intercom allows you to talk to someone in another room or area without having to leave your location, like speaking to someone inside a building from the entrance. We offer **IP intercoms**, which connect to your network, allowing voice and video communication, even remotely through phones or computers, and **analog intercoms**, which provide a straightforward way to talk between rooms without needing the internet. We help you choose the right system to ensure it's easy to use, reliable, and fits your needs.

Advanced Access Control Solutions for Enhanced Security

At **Skills**, our **access control systems** ensure secure, efficient management of who can enter and exit specific areas of your building. We use technologies like keycards, PIN codes, and biometric readers (fingerprint or facial recognition) to restrict access to authorized personnel only. These systems integrate seamlessly with your existing security setup, providing detailed logs of entry and exit activities for full oversight. Whether you need solutions for a small office or a large facility, **Skills** delivers customized access control systems to enhance security and streamline operations.

Efficient Time Attendance Systems for Accurate Workforce Management

At **Skills**, our **time attendance systems** provide accurate and efficient tracking of employee hours, making workforce management simpler and more reliable. Using technologies like biometric fingerprint scanners, facial recognition, or RFID cards, our systems ensure that attendance data is precise and secure. These solutions help businesses streamline payroll processes, monitor productivity, and reduce time theft, while also offering real-time reports and integration with existing HR systems. Whether for small businesses or large enterprises, **Skills** delivers customized time attendance solutions to improve efficiency and accountability.

Comprehensive PBX Solutions IP and Analog Systems for Effective Communication

At **Skills**, we offer both **IP** and **analog PBX systems** to meet your business communication needs. Our **IP PBX systems** use internet-based technology to provide flexible, scalable solutions with features like voicemail, call forwarding, and video conferencing, perfect for businesses that require advanced communication tools and remote accessibility. For more straightforward setups, our **analog PBX systems** deliver reliable, cost-effective voice communication within your organization. Whether you need the advanced features of **IP** or the simplicity of **analog**, **Skills** provides customized **PBX solutions** to enhance connectivity and improve internal communication.

Robust Network Infrastructure for Seamless Wired and Wireless Connectivity

At **Skills**, we design and implement robust **network infrastructure solutions**, encompassing both **wired** and **wireless systems** to support your business operations. Our **wired networks** utilize high-quality cabling and advanced switching technology for fast, reliable connectivity, while our **wireless networks** provide seamless coverage, allowing for flexible access and high-speed internet. We focus on security, scalability, and performance in every installation, ensuring your network is efficient and adaptable to your growing needs. Whether you're overhauling an existing system or upgrading, **Skills** delivers tailored solutions that enhance connectivity and productivity.

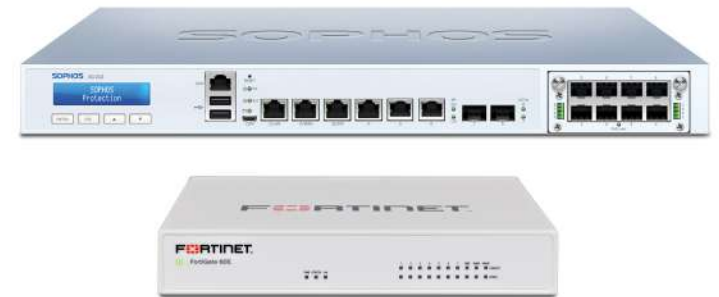

Effective Public Address Systems for Clear Communication

At **Skills**, we provide comprehensive **public address systems** designed to ensure clear and effective communication in various environments, from schools and auditoriums to large commercial spaces. Our systems feature high-quality speakers, amplifiers, and microphones, allowing you to deliver announcements, emergency alerts, or background music with exceptional sound clarity. We offer customizable solutions that can integrate with existing infrastructure and provide features such as zone control, allowing different messages to be broadcast in specific areas. With our focus on reliability and ease of use, **Skills** delivers public address systems that enhance communication and safety in any setting.

Advanced Firewall and Antivirus Solutions for Complete Cybersecurity

At **Skills**, we provide advanced **firewall** and **antivirus systems** to protect your network and devices from cyber threats. Our firewalls monitor traffic to prevent unauthorized access, while our antivirus software offers real-time protection against malware, viruses, and other attacks. We tailor our solutions to your business needs, ensuring regular updates and monitoring for effective, up-to-date security. With **Skills**, your digital environment is safeguarded against evolving threats.

High-Quality Master Antenna Television Systems for Efficient Signal Distribution

At **Skills**, we provide reliable **Master Antenna Television (MATV) systems** designed to distribute high-quality TV signals to multiple locations within a building. Our MATV solutions are ideal for hotels, apartment complexes, and large facilities, ensuring clear reception of both local and satellite channels without the need for individual antennas. We offer fully customizable systems that can be scaled to your specific needs, integrating seamlessly with your existing infrastructure. With a focus on performance and ease of maintenance, **Skills** delivers **MATV systems** that provide uninterrupted, high-quality television services to all users.

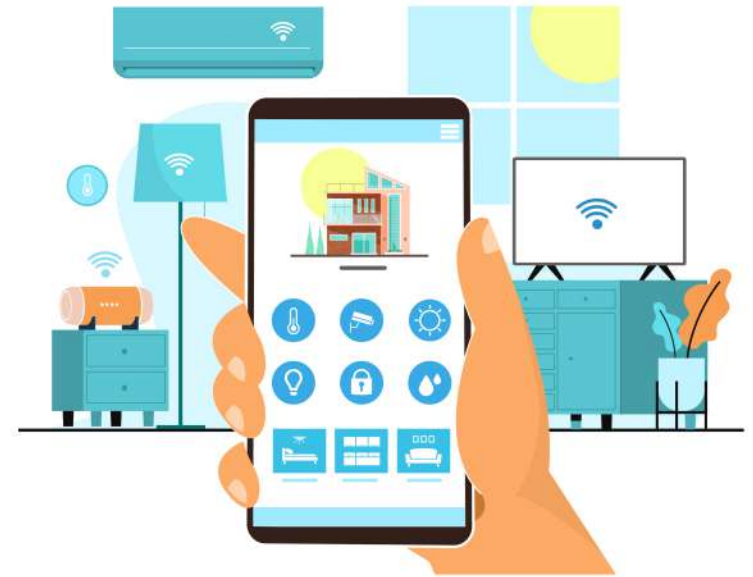

Dynamic Digital Signage Solutions for Engaging Communication

At **Skills**, we offer innovative **digital signage systems** that transform the way businesses communicate and engage with their audience. Our solutions are perfect for retail, corporate environments, hotels, and public spaces, allowing you to display dynamic content such as advertisements, announcements, or real-time information across multiple screens. We provide fully customizable and scalable systems that integrate with your existing infrastructure, ensuring seamless content management and updates. With our focus on delivering high-quality visuals and ease of use, **Skills** ensures your **digital signage system** enhances visibility and creates impactful messaging for your audience.

Smart Home Systems for Convenient, Secure, and Efficient Living

At **Skills**, we offer comprehensive **smart home systems** that bring convenience, security, and energy efficiency to your fingertips. Our solutions allow you to control lighting, climate, security cameras, door locks, and appliances remotely through a single interface, such as your smartphone or tablet. Whether you're at home or away, you can monitor and manage your environment with ease, creating a comfortable and secure living space. Our **smart home systems** are fully customizable to meet your specific needs, integrating seamlessly with existing devices to enhance your lifestyle while optimizing energy usage and providing peace of mind.

Intrusion Alarm Systems for Superior Security and Protection

At **Skills**, we provide advanced **intrusion alarm systems** designed to protect your property from unauthorized access and potential threats. Our systems include motion detectors, door and window sensors, glass break detectors, and more, all working together to provide comprehensive security coverage. With real-time alerts and remote monitoring capabilities, you can be notified instantly of any suspicious activity, whether you're on-site or away. Our intrusion alarm systems are fully customizable to meet the specific needs of your home or business, offering reliable protection and peace of mind. At **Skills**, we ensure that your safety is always our top priority.

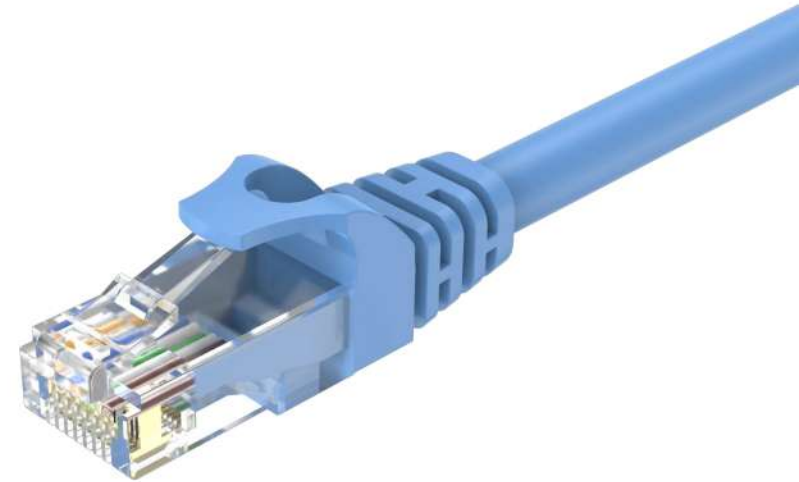

Fire Alarm Systems for Critical Safety and Rapid Emergency Response

At **Skills**, we provide reliable and advanced **fire alarm systems** designed to detect and alert you to fire hazards quickly and efficiently. Our systems include smoke detectors, heat sensors, and manual pull stations, all integrated to offer comprehensive fire protection for your property. With options for real-time monitoring and automatic alerts to local emergency services, our **fire alarm systems** ensure rapid response to potential fire threats. We customize each solution to meet the specific safety requirements of your building, ensuring compliance with regulations and delivering peace of mind. At **Skills**, your safety is always our top priority.

Copper Cabling Solutions

At **Skills**, we provide high-quality copper cabling solutions, including **Cat5e**, **Cat6**, and **Cat6a**, designed for cost-effective networking over shorter distances. Ideal for office environments, these cables offer reliable data transmission, easy installation, and scalability for growing network demands. Our structured copper cabling ensures seamless connectivity, minimizing interference while optimizing performance for everyday business operations.

Fiber Optic Cabling Solutions

For **high-speed, long-distance** data transmission, Skills specializes in fiber optic cabling, including **OS2 single-mode** and **OM3/OM4 multi-mode** fiber optic cables. Our fiber solutions support high bandwidth and low latency, making them perfect for data centers, large campuses, and high-demand networks. Whether for high-speed internet, backbone connections, or industrial applications, our fiber optic installations provide enhanced security, durability, and future-ready networking infrastructure tailored to your business needs.

High-Quality Fiber Optic Tools

At **Skills**, we use **premium fiber optic tools** to ensure precision and reliability in every installation. Our tools, sourced from **top German manufacturers**, are known for their **exceptional quality**, durability, and accuracy. From precision fiber **cleavers** and **fusion splicers** to high-performance **OTDRs** and **cable testers**, we work with the best equipment to guarantee seamless fiber optic connections. By using industry-leading tools, we enhance efficiency, minimize signal loss, and ensure long-lasting network performance tailored to your business needs.

Hotel Management Systems for Streamlined Operations and Better Guest Service

At **Skills**, we offer comprehensive **hotel management systems** designed to streamline operations and enhance guest experiences. Our systems integrate key hotel functions such as reservation management, check-in/check-out processes, housekeeping, billing, and customer relationship management (CRM). With real-time data access and automation, hotel staff can efficiently manage daily operations while focusing on providing superior guest service. Additionally, our solutions are scalable and can integrate with other technologies like key card systems and point-of-sale (POS) terminals, making them ideal for hotels of any size. With **Skills**, your hotel management becomes more efficient, organized, and guest-friendly.

Smart Energy Management Systems for Efficient Hotel Operations

At **Skills**, we provide advanced **energy management systems** for hotels that integrate seamlessly with RFID and MIFARE cards. Our system automatically controls room lighting, HVAC, and other electrical systems based on guest occupancy, helping reduce energy consumption without compromising comfort. When guests use their RFID or MIFARE cards to access their rooms, the system activates energy settings and switches to energy-saving modes when the room is unoccupied. This smart solution not only enhances guest convenience but also significantly lowers energy costs, making it a practical and eco-friendly choice for hotel operations.

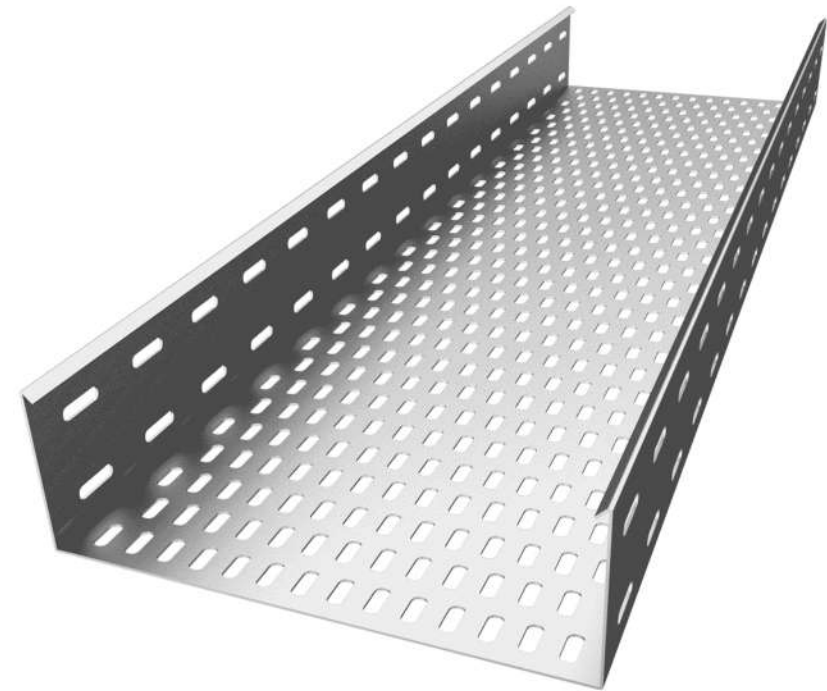

Powering Projects with Reliable Electrical Solutions

At Skills, we provide end-to-end solutions for **electrical cables** and **components**, ensuring robust and efficient power distribution for various applications. Our expertise spans **low, medium, and high-voltage cables**, including **power** and **control cables**, designed to meet the highest industry standards. We also supply and install essential electrical components such as **circuit breakers, distribution panels, conduits, and cable management systems**. By utilizing premium-quality materials, we guarantee safe and long-lasting electrical infrastructure tailored to your project's specific needs.

Custom-Engineered Cable Trays for Every Need

We **manufacture** high-quality **cable trays** in **any size** to meet your specific project requirements. Our trays are designed for **durability**, **efficient** cable management, and easy installation, ensuring a well-organized and secure wiring system. To enhance longevity and **resistance to corrosion**, we also offer **galvanization**, providing a **protective coating** that withstands harsh environments. Whether for **industrial**, **commercial**, or **infrastructure** applications, our cable trays deliver strength, reliability, and customization to support your electrical systems.

Reliable Power Backup and Voltage Regulation with UPS and Stabilizers

We **provide** and install **Uninterruptible Power Supply (UPS)** systems and voltage **stabilizers** to ensure continuous, stable power for critical equipment. Our **UPS solutions** offer seamless battery backup during outages, while our **stabilizers** protect against voltage fluctuations and ensure a steady power supply. Whether for **small office** setups or **large-scale industrial** applications, our systems safeguard your equipment from power disruptions, data loss, and hardware damage—keeping your operations running smoothly and efficiently.
